Forever young

A new phenomenology

Love is the answer

Aryans prepare!

A new age coming

Abstract

Our love is revolutionary! This is the inner truth of the Aryan race and what we have set out to prove in a range of writings during the last year. I fell in love with a beautiful woman and we have been together for 6 years now. This is Aryan love and this is how it all started. Today, we have developed a brand new theology based upon the primacy of love and the dialectics of the heart, we have a new phenomenology, we have solved the mysteries of creation, and ended the search for the Holy Grail – ascension.

We are the second generation of Aryans since the Second World War and our mission is to redeem the Aryan race. History has been distorted, so as to portray the Aryan race as the enemies of mankind. We set out to bring new esteem and courage to the Aryan people despite this treasonous act of the Allied forces and we do this by proving that we are divine and that our faith is divine love. This is what we fight for and this is revolutionary. Love brought us here and love will bring us back to heavens. We prove, that the goal of mankind is aufheben, transcendence and salvation, and that we are heavenly divine. Much of the history and truth of mankind have been suppressed and we reveal who are the true culprits of this occultation. With the resurgence of the Aryans for a new, golden age, mankind is forever free and it is now a question of realizing this golden age that is upon us. We thank all our great allies and supporters worldwide for great courage and inspiration and we look forward to continue the great cooperation towards our spiritual freedom. Love is the answer and this is a revolution.

Forever young

I told her I loved her forever. She said she was even-hearted for the white day. I told her I believed in the eternal life. She said it was true, we live forever in heavens. We are angels of the immortal heart – we are in love. Love is divine. Since then, we have been together for almost 6 years now. This was the beginning of the Aryan revolution. Since then, the Aryans have been reunited. Thank God. It is like coming home after having lived behind enemy lines for years. We are the new generation of Aryans. We had to teach ourselves all the skills and honors of being Aryan after they killed millions of our German fathers and brothers. What a devastation. We are the second generation of Aryans after the war. Recent history has been so skewed, so as to make the Aryan man and woman the enemies of mankind. What a tribulation. We grew up in liberal and Marxist milieus. What a disgrace. Those people are without honor and faith. Sometimes in my childhood, I felt the Holy Spirit hovering above me. This was a sign – a divine omen. It was there I felt that truth was in my mind, soul and spirit. I remember all the times in my childhood, were I felt as if heavens was opening up above me. Otherwise, we grew up in this false milieu, where everybody was living an illusion. This we now call the *liberal illusion* or *phantasy fiction*. People were mostly friendly, but something was missing. You cannot deny the destiny of a race. You can attempt to suppress it and make up excuses, but the truth of our people could not remain hidden. Now that we have reached adulthood and have started to meditate and philosophize ourselves, things are more clear. We now know our history, having filtered out the liberal-Marxist bias.

The liberals and the Marxists cannot deny the love of the Aryan race. We are born of a heavenly heart. The new generation of Aryans have been evaluating upon recent history, but even the more important, we have made our own meditations and reflections upon the meaning and purpose of life and existence. Having read Plato, Plotinus, Kant, Hegel, Nietzsche and Heidegger, and we are read in the ancient mystery religions and the Indian Vedas, we have come up with our own transcendental philosophy and phenomenology called *new idealism* (Riis-Søndergaard, 2022a). This new philosophy is based on the conceptualization of *the true man* (Riis-Søndergaard. 2022b). This is a brand new concept that will replace all former idealization of the nature of life and existence. We see ourselves as guardians of the Holy Spirit, the Vedas, the Eddas and the Holy Grail (Riis-Søndergaard, 2022c). But more importantly, we see ourselves as divine, children of the immortal heart. We find the present atheistic and soulless liberal-Marxist regime a disgrace to mankind. Those people are without history or heritage. Our new knowledge of self, spirit and heavens is therefore revolutionary to the present world order.

We have reinvented the concept of race-mysticism, based upon our experience with transcendental meditation, tantra and Kundalini-yoga. Those divine aspects of our lives are deeply suppressed in modern liberal society. The European Christian, Aryan nations never succeeded in bringing those elements to the consciousness of out brothers and sisters, before they were brutally suppressed. Today it is almost illegal to speak of such a transcendental reality. It is therefore true to say that our heavenly love is revolutionary, for accepting those qualities of our lives would mean a massive transformation of society that would now be a spiritual society, based upon the mysteries of heaven and the chakras and Kundalini-yoga of our race. The tantric-romantic-poetic, phenomenological life, we live, is proof of a new age coming and a guarantee for spiritual freedom and liberation. This we call *aufheben* (2022d).

A new phenomenology

So what are the conclusions to the recent meditations and reflections of the Aryan race? Hegel warned that truth is as much as a result the experience of the unfolding and development hereof. Hence he used the term phenomenology of his philosophical work on the life and consciousness of the spirit (see foreword in Hegel, 1807). Life is lived. We take this approach as a sound understanding of the importance of the lived experience, that is, of life itself. Man is not just some by-product of existence or some random and contingent being, but a being with an ontological relation to life. That is, man is pivotal. What is new to our philosophy is that we equate God, man and love. This we find to be the best expression of the truth of being. We are heavenly and divine. Love is divine. What we need to realize is the phenomenology of our experience as divine beings – our self-actualization, as beings responsible for the ideal of man, that is, the good, the true, the right and the beautiful. It is with a tremendous relief that we can make this equation, for this seems to be what has been missing from previous philosophy. There is life in heaven. Heaven is not just some dead space in an abstract thought about the absolute. What is new to our philosophy is that we claim to be alive on the transcendental plane. Therefore our philosophy is a new idealism, transcendental. This is a marked difference to Kant's transcendental formalism, but more akin to Hegel and Heidegger in their understanding on the nature of reality and the existence and purpose of man as an existential agent.

So there is life in heavens. This is great news. As such, we are Christians, Aryan Christians, more precisely, for we believe that this transcendental life and heavenly love is what differentiates the Aryan race from the other races of mankind. It is so to speak an Aryan heaven. This is revolutionary. It will be up to the present generation of Aryans to prove that this is the fact and that the mystical union, the tantric-romantic-poetic relationship, the race-mysticism of transcendental meditation and Kundalini-yoga of the Aryan race, is ground for a new theology that is the truth and nature of life. By accepting the transcendental reality of life, we have solved the mystery of creation and we have ended the quest for the Holy Grail, ascension and salvation. This is redemption. And this a revolutionary development.

We therefore take the best from the continental philosophy of Plato, Plotinus, the Christian church, the Indian Vedas and Hegel, Nietzsche and Heidegger combined with our own experience and meditations to establish a new philosophy for the 21st ct. that is an answer to the question of creation, that is the truth of being and heaven. This knowledge of self, the transcendental and heavens used to be deeply esoteric, if it has ever been stated so directly. Even though philosophers like Hegel, Nietzsche and Heidegger were close, this knowledge of the reality of life was kept secret in the Christian church and among Christian mystics and has not really been spoken about since Plato, who had an esoteric teaching, and the Neo-platonists, Plotinus (see Plotinus' *Enneads* on ecstasy and transcendence*)* etc.

But we need not look far away to encounter mysticism and esotericism. Here at home, on the continent, we are currently ruled by a deeply esoteric organization, namely the Freemasons. Our philosophy is a confrontation with those forces that have occulted the true knowledge of the nature of reality and heavens for so many centuries and are the power-holders of liberal modernity to this very day. We promise to confront those forces to once again bring the true light to mankind, as we represent the White Order of the world and all true spiritual liberation. This is aufheben. This is revolution.

Love is the answer

What initiated this uprising and revolution of the Aryans in the 21st ct. was the divine love of two people. I myself had had an awakening the previous year to the fact that the Aryan race was alive and divine, but it was only when I met this other Aryan and instantly fell in love with her that all the mysteries of creation were revealed to me. Love is the answer. We have much more to tell of our theology that we have developed, but what is most important is the theological concepts of the 1) primacy of love and 2) the dialectics of the heart. As such, when we meditate, it is a hermeneutics, for we seek out the truth of the heart as the mystical bond between two eternal lovers – the immortal heart. This is the eternal life. This is heavens.

We can now define ourselves as transcendental beings with a life in heavens. This is a revolutionary statement. When we come to power, which we will, for this is the destiny of our race, the world will be a wholly different place for mankind. Love is the highest principle and it cannot be suppressed anymore. The Freemasons have suppressed this divine love for centuries and created a monstrous liberal regime of biopolitics in its place. This is the neglected background-story to the Second World War and when you realize that the war was carried out to uphold this regime of suppression against the divine Aryan love, you realize that this tyranny can't go on any longer. It is Orwell's *1984*, when they try to suppress the divine love of the Aryan race.

“The truth is out there”, as Mulder in *X-Files* would let you know. Orwell knew precisely well that the truth of life is divine love. Two people, who love each other forever. This is the truth of heavens and the truth of mankind. Heaven is given for the Aryan race, but the whole of mankind can start to meditate, that is, listen and reflect upon the nature of existence and the mysteries of creation and the Holy Spirit will be his and her guide.

Much is true in Christianity, but we beg to realize that the 'true man', the God-son and daughter, is the Aryan race and not a Jew from Palestine. That is why the Vikings had to invade and conquer Rome and take on the rule of the continent, as they did, to prove that the true God-man was the Aryan/Nordic Viking, before they could convert to Christianity. Our philosophy disentangles the Aryan/Nordic/Christian truth and legend from the Semitic influence on history.

The Second World War proves that this fact still remains a contentious subject, though what has to be realized is that what the Aryans fight for is *love* and not some mad scheme of world dominion. Aryans love each other and this is our faith. Nothing more, nothing less. Love is the actual lives of the Aryans and not just some remark or poetic passage in some historical or recent literature. It is even the less some American sit-com or celebrity show that has so subdued recent culture on the continent. We are true people, not some personas or celebrities, and we love each other forever. We are the true man and woman of divine beauty and righteousness and we have had enough of the false world of celebrities and rich people that so dominate the cultural sphere of the West in recent times and under the Neo-liberal regime. This falsehood will have to stop and in its place we will establish a kingdom of God – the spiritual truth of our race. It troubles my mind that the proud Aryan culture and *bildung* has been replaced with a world of empty celebrities. To this we say: no more and never!

Aryans prepare!

Our love is revolutionary. In the future, we will live in a world led by an Aryan spiritual aristocracy that guides mankind on the path towards spiritual enlightenment and liberation – a golden age. We will meditate on the transcendental and practice Kundalini-yoga and tantra in the sky. The chakra-system and the Kundalini of our race have been so suppressed in the West and when we rediscovered these qualities of our lives, we were full of joy and hope. This meant that we were truly divine beings and that the truth of man is sacred. But we must be ready to fight. The Freemasons and Illuminati, who currently rule the world, will not give up without a fight. They have had success in casting the world into a fog, when it comes to questions of theology, metaphysics and the transcendental. This knowledge of the true nature of man will have to be reestablished, so that we might once again speak freely of our race and heavens in a true manner.

It is important that all the Aryans and the Christian mankind prepare for the world revolution. This is happening as we speak. The recent right-wing success in the USA and France is a great hope for the Aryans that these two countries, which traditionally have been liberal, have now come to a sound reasoning about the meaning and purpose of life and realized that the liberal worldview is an illusion, which only benefits a minor elite of the wealthy. Russia is already on our side, with their national-conservative profile, and then we only need to reawaken Germany, where the AfD has been making great progress. So there is imminent hope. The election of Donald Trump, we can say, marked the beginning of a new age. The Americans had realized that the traditional social and liberal parties of the Democrats and the Republicans were conspiring to suppress a true Aryan/Christian awakening of the country and now they claimed as president a true alternative-conservative profile. The same is true for France, where Le Pen recently had a great election. The people is mobilized and ready for a new world order. In Denmark and the other Northern countries, we have been living under this ontological, social-liberal conspiracy since the end of World War II (see Riis-Søndergaard, 2022e). Recently a new center-government was elected in Denmark. The socialists and the liberals have conspired to form a government, which we have also seen in recent years in Germany under Merkel. This is troublesome to the Aryan people. In our investigations, we have found that this new government is a masonic and Illuminati government. We believe in pure politics, that is, a metapolitics (see Riis-Søndergaard, 2022f), which is inspired by the dialectics of the heart and our new phenomenology of spirit. We wish that theologians will once again rule the academy and that the population will once again be united in the church for a spiritual and faithful life. We have established the Aryan Nation, which is the gathering of all Aryans and a supranation that will replace EU and the UN as the organizing politics of the world.

Time is now to rise up and demand a spiritual revolution on behalf of mankind – a revolution of the heart. In these months and in the next couple of years, the Aryans will move forward with our program for a new world order. We will establish a worldwide party, in the North called *Nordic Alliance,* to gather our fellow citizens for a new spiritual politics. The old system that was setup after the Second World War by the Englishmen and the Americans is faltering and a new age is upon us. We wish that all Aryans and the Christian mankind move together as the path towards spiritual freedom might be rough. But we are full of hope and optimism, since what we bring is *good news*.

A new age coming

The good news is that we are united by faith. From the sages in the East to the right-wing American Christians in the West, we have a common bond and a shared destiny. It is the destiny of spiritual freedom and liberation – enlightenment and redemption. “Amazing grace”, they sing in the West, and in the East, they meditate and chant for the blessed day. This is a tremendous hope. We have all the world before us. There is no doubt that mankind deserves a better future, than what the rationalism and scientism of the Freemasons and the Illuminati have given. The truth of man is the truth of the heart and this will be the teaching of the new age. This teaching will be accompanied by a great gathering and unification of the Aryan/Christian mankind and our nations will once again prosper in the true faith and by the mercy of heavens.

The leaders of the new age are the Aryans, who will setup the Aryan National State, where all Aryans will gather for transcendental meditation and Kundalini-yoga. The Kundalini is the power that makes it possible to talk about ecstasy and transcendence – aufheben. This is the natural inclination of our people and in our meditations upon the meaning and purpose of life, we have realized that aufheben is the true goal of the human race, that is, ascension. The Holy Grail is divine love. When we meditate for prolonged periods of time, we literally get a halo around the head. This is due to the pineal gland being active. Descartes, despite being a rationalist, called the pineal gland the seat of the soul (Descartes, 1649). It is truly a blessed life. To think that all this knowledge of our true nature and potential for spiritual enlightenment and liberation has been suppressed for all this time. But now, we are free again and this time forever. Nothing can stop us on our path towards ascension and redemption.

It is with great awe that we are embarked upon this path of truth and salvation. We call it *the way.* War will be over, the minute the Aryans come to power. This is for sure. The Second World War was a grave mistake on behalf of the Allied forces, who attacked a holy Aryan/Christian nation, the Germans. We will never tolerate evil or malintent in the world and those deceivers responsible for the Second World War should never be allowed back on the throne. We can see what they have accomplished meanwhile: an unjust world full of greed and pointless self-interest and entertainment and financial exploitation (see Riis-Søndergaard, 2022g). The former world order was an anti-thesis to divine, revolutionary love. It was Orwell's 1984.

We represent the White Order, a benevolent and just order of all good people, that seek enlightenment and spiritual liberation. The Aryans are leaders of this White Order and worldwide, we seek to establish the Kingdom of God for a new, golden age. The new age will be a haven for all of mankind, not counting those deceivers and doers of evil, who are also in the world. Truth will be revealed and mankind will dwell in spiritual enlightenment. It is good luck. We count all the people of good faith and a loving heart, which luckily is the greater part of mankind. The goal is aufheben – these are the latter days.

The Aryan revolution is just getting underway, but already we have accomplished so much. We have developed a new theology and a program for worldwide spiritual liberation, as well as a new form of government. And this all started, when I fell in love with a beautiful girl. Thank you.
