Occult psychology

Metapolitics – The occult politics of metaphysical war

Abstract

In this paper, we conceptualize the metaphysical, occult war that today captivates the world. We consider the Hindu concepts of 'samsara' and 'maya' to explain the transcendental nature of reality and the paper argues that the prime aspect of the cosmic war between the forces of good and evil is a question of faith and epistemics.
We dissect the main ideologies of post-modernity in the wake of the Second World War, namely Neo-liberalism and Marxism, as well as Christianity, and conclude that these dominant ideologies are not capable of defending the Aryan race and all good people from the “evil demon” that haunts Europe nowadays.
We describe the Aryan occult psychology, as markedly different from conventional psychology, neuroscience and psychiatry, because these perspectives lack regard for the metaphysical, occult nature of reality.
Therefore, we argue that these ideologies and scientific perspectives are the inventions of an, following fx. Descartes, evil demon (demiurge), the great denier and deceiver, that haunts the epistemics of mankind.
The goal of this evil demon is to deny mankind truth of the spiritual life, by proliferating falsehood in the form of primarily atheism and materialism.
Countering this demon and evil people in general, the Aryan race fights for the ultimate redemption of the good mankind by the implementation of an Aryan spiritual aristocracy of metapolitics, which we describe as the latter days, reaching aufheben – the religious upheaval of all good people.

A ghost is haunting Europe

Even though we, the Aryan elite mainly residing in Denmark, don't read Marx a lot, because we don't support atheist, materialist communism, the Communist Manifesto (1848) was right in proclaiming that Europe was *haunted by a ghost* – a spectre. But the truth is that this ghost has haunted the good mankind since prehistoric times. Likewise, Descartes spoke of an "evil demon" that deceived and manipulated men in the epistemics (Descartes, 1641). Earlier, Christianity was ripe with demonology, to explain the occult sphere, and in ancient times it was common to acknowledge a spirit-world, pervading the existence of mankind. Socrates, for example, believed that he was guided by an inner voice, a spirit called a *daimonion* (Plato, 399 BC). Though the spirit of Socrates was good, it is about time that we tell the full story of this other ghost, so mankind may once again be free from the evil demon (demiurge) and gain spiritual enlightenment and liberation that is so much needed in this post-modern Kali Yuga, the last epoch before a new golden age, according to Aryan/Hindu belief.

Since the Aryan elite united back in 2017 to further the Aryan awakening and gathering, we have made groundbreaking discoveries in theology, ontology and epistemology. It is still early in our gathering, but already we have discovered the highest theological principle, namely the truth and law of the heart, as the principle of creation, what we call *the primacy of love*. We have also discovered, that *evil only exists in temporality*, for heaven, the transcendental plane, is absolutely good. In metaphysics, therefore, we talk about *the war of heavens* on earth against evil. A more radical proposition, we have discovered, is that, as there is a source of creation, the good and heavens, namely the Aryan race-father and -mother, there is a source of worldly evil. It is, so to speak, a fundamental ontological difference. We have found in our theory and in worldly experience that the cause of evil is *a singular evil, worldly and temporal demon* that haunts the good mankind and especially the heavenly Aryan race and which leads evil people in their malpractices. In our ontology, we operate with a distinction called the *ontological regime,* which calls for a total demarcation to evil, because good people are guided by the call of the heart, the Holy Spirit, while evil people are led by the evil demon and are proxies.

What we have just stated is our working thesis, so far. Therefore, it is a spiritual, occult war that is waged on earth. It is war between good and evil, positive and negative, light and darkness, day and night. The Aryans are guardians of the Holy Grail, namely divine love and ascension, and tradition and order, the pact of the day, while the singular, evil demon attempts to subvert tradition and bring chaos to the world. Marx was right in claiming that this ghost was, among other belief-systems, Communism, for Communism is materialist and atheist, and the objective of the evil demon, that haunts the world, is to cause disbelief in religion and manifest an atheist, materialist, scientific, positivist and empiricist world order. The battle against evil is mainly fought in the reason of mind, in the epistemology of all people on earth, for here the evil demon is the great denier, the great deceiver and at times outright evil and malevolent. Evil is very base, so the evil demon has no courage or pride, but only attempts to destroy good people, tradition and order in the world, to cause havoc. But it is a speculative evil, for it causes evil people to conspire to further the goals of the evil demon, which eventually leads to conventional war, which is so prevalent in the Kali Yuga. But it is an ancient war, for good people have fought off this demon since prehistoric times. The battle between good and evil is a common thread in most ancient religions, the Veda, the Edda and Christianity, but today we live under a liberal/Marxist world order, which denies this existential war and claims that all people, no matter if they are good or evil, should be regarded as equal. They are proponents of universal equality and liberty among the world's population. This is a grave mistake, for in claiming that, they deny *the metaphysics of war* and the ontological regime of good versus evil. The main objective of the evil demon is to uphold the illusion of temporality by proliferating atheism and materialism, whereas the true nature of life is the Aryan heaven, the transcendental plane of existence. Therefore, the life of good people should be regarded as a phenomenology of spirit (Hegel, 1807 and existence in temporality should be regarded as an occult war of truth and epistemics against hatred and evil.

IDA – The International Defense-force of Aryans

To oppose the menace and havoc created by this evil demon and all ghostly people, the Aryan elite, mainly residing in Denmark, the rest of Scandinavia and Germany, has established IDA – The International Defense-force of Aryans. Together with all good people of the world, which include for example India and Japan, whom we greatly esteem, we work to establish a new world order, abandoning liberalism and Marxism, as well as atheism and materialism, which are so evil it is hard to fathom for good people.

The Aryans are not that many. Currently, we estimate that we are between 10.000 and 100.000. It is a hard topic to investigate, for today no demographics are being made on race, but only national identity. This is typical for liberalism, the global control society (Deleuze, 1990), for they don't acknowledge race at all. Instead of talking about the Aryan race, they have substituted the term "Aryan", which means noble and free, with an amalgam populace of the concept "Indo-European", which covers the whole European population, as well as some Eastern peoples. The truth is that the truly Aryan race is distinct, though spiritual related to the Nordic and Germanic peoples. The Aryan race incarnate and reincarnates from heaven and the rest of the good mankind have come into existence in what we term "the light of heavens". That means they are guided by the Holy Spirit and *the call of the heart*.

It is important for the Aryan elite to make a remark concerning Nazism. For, while the Nazis in general defended the Aryan cause of the heavenly reign on earth, the Aryan elite doesn't believe that the world should be conquered by force. Rather, *the world should be conquered by faith and epistemics,* that is, by absolute truth, true belief and sound theory. The battle is first and foremost a battle of ideas and ideology, but also a battle of pride and courage. Therefore, we have invented the concept "Stratagem" to explain Aryan warfare epistemics, which we will discuss further in the next section of the paper (see also Riis-Søndergaard, 2022a, where we develop the concept).

Another point to make about Nazism is that when we today reflect upon Nazism, we note that the Nazis lacked the necessary theology and metaphysics to properly convince the world of the Aryan cause. This notion we want to redeem today, as the Aryan elite is making tremendous progress in construing a proper theology. But then again, we find that the Nazis were not solely responsible for the outbreak of Second World War. Rather, the war was the result of a nefarious conspiracy of the allied forces. Hitler made several remarks, where he compared English and American liberal capitalism to Satanism and this we find to be all to true, actually, when you consider that this worldview, liberal capitalism, is atheist and materialist, which also is the case for the other great conspirator of the War, namely Soviet Communism.

So it is a battle of ideas – of ideology. It is popular today to claim that in the post-modern world, ideologies are dead and only a materialist, empiricist, positivist, secular/atheist reality is accepted as naturally true. This is a great deception. Opposing this stronghold of democratic liberalism, the Aryan elite is proponent of *a return of ideology,* more precisely the construction of *a metapolitics*, founded in the theology of the Aryan race and all good people, which is the truth and law of the heart, the metaphysics of war and the ontological regime (see Riis-Søndergaard, 2022b).

One aspect of the Aryan religion, we wish to establish, which the Nazis lacked, was an understanding of the Vedas, the Aryan vision of spiritual enlightenment and liberation, which was brought to India, when the Aryans colonized that area. This is the true Aryan religion and culture, which we explain in another paper (see Riis-Søndergaard, 2024a). The Nordic/Viking Edda came later, but is also important for understanding Aryan history. But the Aryan elite today wishes to distance the Aryan religion to that of Christianity, for it is false to claim that 1) there is only one creator, when in fact there are two – a man and a woman, and 2) it is likewise false to claim that the God-man was a Jew from Palestine, when the reality is that the holy, heavenly race is the Aryan, and the Semites are completely foreign to the Aryans. This is grave historical err and definitely another conspiracy of the evil demon, the Romans and the Jews, to attack the holy Aryan race and our main allies, the Nordic and Germanic people.

Epistemics of the occult war

An important notion in the Hindu religion is the term "samsara", which means "wandering" and "world". It is a notion put forth in the Upanishads – a later text, than the original Vedas, but which comments on wisdom, theology and philosophy. The concept refers to the cyclic existence of rebirth in the mundane world. When liberated from samsara one reaches Nirvana, liberation from the cycle of rebirth. This is the truth of the Aryan race, which is here described. As far as we can tell today, by our own original meditations on the Vedas, which we have discovered to be a timeless aspect of the collective consciousness of the Aryan race, a transcendental wisdom and therefore most contemporary for meditations (see Riis-Søndergaard, 2023), the rest of mankind reproduce by biological means, though it must be said that we still believe that the rest of the good mankind incarnate from the soul into the body and are therefore born "in the light of heavens" and in light of the transcendental Holy Spirit. But reincarnation, properly speaking, is only for the few Aryans, who are all of the heavenly heart. It makes sense, for, as we noted in the last section, the Vedic tradition is Aryan.

Another interesting term from the Hindu and Buddhist religions is the concept "maya", which means "appearance" or "illusion". The term describes the physical world, the world of phenomena, as an illusion, whereas it is differentiated to the spiritual and absolute realm, the transcendental realm. This is another ancient Aryan invention. To continue this line of thought, today we describe worldly existence as an occult war between the forces of light and the forces of darkness, and given that the physical life is mere appearance or illusion, life must be understood as *a phenomenology of spirit* rather than a mere physical phenomena. Liberation from the occult war of heavens against evil necessitates victory, as we believe that only ultimate victory over evil, defeating evil, will assure the Aryan race salvation and ascension. This is the Holy Grail – divine love of the Aryan race and ascension, redemption from the illusory temporality for the eternal life of heaven.

In fact, we know that the holy Aryan race has incarnated into temporality to fight this occult war against evil. We call it: "When war came upon us." That means, we are not responsible for the introduction of evil and the outbreak of cosmic war, but we are responsible for solving the conflict in favor of the absolute good and heavens. We call our path towards spiritual liberation for *the Way*, which we have described in another paper (see Riis-Søndergaard, 2024b). This is to a large degree an epistemological way, so we equate epistemology, the epistemic warfare, with the way, for ultimately it is a question of faith. The Vedas, we recognize as the precognition and foretelling of the triumph of the heart and the final victory of good over evil (see Riis-Søndergaard, 2022c). We have faith that when the war is over, temporality will be absolved and the Aryan race will return to our homeland, heavens.

Given that victory over evil primarily is a question of faith, warfare epistemics, the battle of ideas, ideology, become all important, for we want good people to have faith, for faith is all powerful in the occult war. Therefore we term the reason of mind warfare epistemics, for we combat an evil entity that is responsible for evil in a worldly existence of spiritual phenomenology. Therefore the Aryan race considers itself warrior-monks, philosopher-lover-sovereigns. This is the true way of the heart, for the truth of the heart is all powerful.

We wish, that the good mankind will be liberated from the nightmare of the evil ghost that is haunting especially Europe, where the atheist and materialist ideology is dominating the real-politics. Therefore, we make the plea with the good mankind to establish a metapolitics on the continent that will first and foremost guard the spiritual truth of existence and next be victorious in the battle of ideas against evil atheism and materialism, for this is the true occult war. We are defenders of a tradition that goes back to the ancient Aryans, and which is the cause of all true wisdom, so we make a plea with the good mankind to be vigilant in the epistemics and combative, wherever we confront evil in the world, be it in the epistemics of faith or in the action of real-politics, for the truth is that all of life must be considered spiritual and occult. This is the highest notion, we wish to emphasize and in sharp contrast to the soulless Neo-liberalism that so pervades the politics of today.

Occult psychology

As a marked difference from the understanding of conventional psychology, the Aryans inhabit *the aether*. Rather than theorizing an unconscious dimension of the psychology of man, we are actually proponents of the absolute truth of race-mysticism and the collective consciousness of the Aryan race. Life is, as we have mentioned, remarkably spiritual. The proposition of an unconscious dimension of the psychology of man is actually a deep occultation and obfuscation of the truth of psychology – it is a nefarious and dark plot by the evil demon to enslave mankind by denying the spiritual nature of life and absolute truth of the heavenly heart – the Holy Spirit. Acknowledging an unconscious dimension of the psychology of man renders man a subject of drift and instinctual behavior – like an animal. This is a serious occult attack on the soul of good people that in nature is guided by the Holy Spirit and the call of the heart – the call of heavens, which we then describe as *transcendental intuition*. For the heart of good people speaks absolute truth and is totally resistant to evil and negative thoughts. The truth is that all negative thoughts stem from evil interference – occult aggression.

Likewise, neuroscience is a dark and evil attempt to deny the spiritual nature of life, as neuroscience proposes,that consciousness is an "epiphenomenon to biological processes". Nothing could be further from the truth, for the consciousness of ontological good people is guided by the transcendental Holy Spirit, whereas evil people have no soul and no spirit – they are ghostly – apparitions of the evil demon that haunts Europe today. For evil people, it is true to speak of an unconscious dimension for they behave like zombies, antagonistic to the truth of the heavenly heart. They are not capable of developing a conscious life, a life, that is absolutely spiritual and by the truth of the heart, for they are mere slaves of a diabolic conspiracy of that which has no heart and no faith – the evil demon, before mentioned. Therefore it is adamant for good people to be vigilant in their psyche, which means "soul" in ancient Greek, for the opposite would render them weak in the battle against evil interference.

The situation is even worse, when we consider the history and modern expression of psychiatry, for they are completely atomistic in their conception of man, considering man isolated and all alone, and they don't acknowledge neither race-mysticism, nor the collective consciousness of the Aryan race, nor the Holy Spirit, which guides the good mankind. This is an extreme danger to the psychological climate of the Western world. Again, we wish to emphasize that it is an occult war and a battle of ideas. Agamben (1998), the Italian philosopher, writes about the Neo-liberal society as an inversion of the camp found in Nazi-Germany, where the populace is kept enslaved by biopolitics, but an even more radical assertion is that the Neo-liberal society is an *inversion of the psychiatric ward*, where mankind is kept enslaved by a completely false paradigm of an almost animalist conception of man, as mere physicality and instinct.

The three aforementioned fields, conventional psychology, neuroscience and psychiatry, have no concept of faith, honour and pride. Instead, they consider mankind an advanced animal and existence completely mundane – they are the epitome of atheism and materialism and therefore the invention of the devil itself. The result of this prevalent paradigm is deep alienation. To regain sovereignty, the good mankind must resist this false paradigm and reinstate the true constitution, which is the rule of the true philosopher-lover-sovereigns, the Aryan race. Therefore, we call for establishing an Aryan spiritual aristocracy to rule our lands and bring spiritual enlightenment and liberation to the good mankind (see Riis-Søndergaard, 2024c). Only the heavenly Aryan race can safeguard the good mankind from the nefarious conspiracy of the devil to enslave mankind as mere physical labour and energy, with no higher purpose. The truth is that there *is* a purpose and a destiny of the good mankind and this is *aufheben* – the religious upheaval of all good people in the latter days (see Riis-Søndergaard, 2022d). The Neo-liberal/Marxist paradigm is a traumatic experience for all good people, for in these politics the good mankind is denied spiritual enlightenment and redemption from evil. This leads to all kind of spiritual ailments and grievances, which can only be alleviated with the introduction of metapolitics.

Metapolitics – The occult politics of metaphysical war

In Plato's *Politeia* (375 BC) it is said: “Never let foreign poets into our city”. Plato's ideal state was to be ruled by a philosopher class, guarded by a military class and supported by a working class. Socrates and Plato knew very well the danger of subversive foreign influence. Today, in Europe, we have the tough fate of witnessing mass immigration of Islamist people, a completely and ontological foreign people to the Aryan race. This is the inner truth of mankind and as the Aryans say: “The foreign can never be known, for only that which belongs can be known”. The aforementioned philosopher-class is the Aryan race, for we reign supreme in heaven and our goal is to redeem the good mankind from evil. Therefore it is adamant that we purge our countries from foreigners, for they are not of the same blood and spirit as is our race and allies. The Semites are foreign, so are the Africans – therefore we demand the deportation from our homelands of all foreigners. Again, this is why we must abandon Christianity and establish a new Aryan-Vedic religion in our countries. Plato's state was build on metapolitics, as the organization of the state was inspired by the metaphysical truth of life. There should be a correspondence of the ideal of man and the ideal of the state – this is the true constitution, and the ideal of man is the heavenly Aryan race. Plato's state was not a democracy – it was a mystical aristocracy that believed in the transmigration of the soul, metempsychosis, which is true for the Aryan race, and therefore, as we have mentioned, the Aryans propose to establish an Aryan spiritual aristocracy to rule the land of our good people. This is the jumping point of today's politics. Instead of Neo-liberal/Marxist universalism and admixture of populations, multiculturalism, we, the Aryans, are proponents of race-regionalism. The world’s populations belong to regions or more specific to nations, as is the case of India, that deported the Muslim population of that country to Pakistan and Bangladesh, for what is important is spiritual and cultural homogeneity of race – an ontological regime of blood and spirit. Therefore, we wish to distance ourselves from the Semite race in terms of politics, culture and religion, for they do not have the same faith and destiny as we do. The migration policies of the European Union are definitely an nefarious plot to subvert the homogeneity of the European countries, construed by the aforementioned evil demon. This is at present the ghost that haunts Europe, for this is the homelands of the Aryan race and our natural allies. It is with a tear in the eye that we witness our homelands flooded by immigrants of foreign blood. But we know, it is an occult war of faith and epistemics. It is a post-modern occupation of our homelands, as one foreigner in our lands is one to many – the result of the outcome of Second World War. We have studied American political sceince and have concluded that the goal of American political science in the aftermath of the war was to prevent that National-Socialism could rise again on the European continent and to cause internal discord in our homelands by introducing complete foreigners. This is without a doubt the case for the occult politics of the metaphysical war that today is ravaging the world – the case of the Neo-liberal/Marxist paradigm and world order. It is therefore paramount that we establish a renewed metapolitics on the continent that will defend the holy Aryan race and all good people against foreign invasion and which is capable of combating the nefarious and dark subversive plot of the evil demon and its proxies.

We wish to conclude this introductory paper by emphasizing the main points: 1) True Aryan culture is Vedic culture and the Edda, and not the foreign Semite/Roman Christianity. 2) Aryans are of the heavenly heart and all good people are born in the light of heavens. 3) We demands total demarcation to evil and the evil demon that haunts Europe. 3) Heaven is true life and temporality is an illusion, and more specific an occult war between the forces of light and the forces of evil. 4) Given those propositions, the important consideration to make is that the occult war is fought mainly in regards to faith and epistemics, so it takes a strong heart, and not the false idealization of a weak heart, as Dostoevsky (1848) wrote about and which the universalism of Christianity and Neo-liberalism promotes, to combat evil. 5) The necessity of implementing an Aryan spiritual aristocracy of metapolitics to redeem the good mankind from evil and reach aufheben – religious upheaval. These are our main points. Thank you for the support of the great cause and good luck.
