The Aryans and the doves – A myth for the 21st ct.

The Vedas today – A poetic-mythical worldview

The aether, visualization and "the other side"

Epistemic fields of the ever

The flight – A transcendental journey

**Abstract**

This essay is a proposal for establishing a new telling of the truth of the Aryan race – a poetic-mythical and transcendental tale of the Aryan race. By out present lives, we wish to inspire good people to take up epistemic arms and contribute to a new and just world order, based on the the true religion of the Aryan race. We describe in the essay the concept of the Veda-dove – a concept we use to define the Aryan race and our heavenly and transcendental mission to defeat evil and reach aufheben. We call it the flight of the Veda-dove, for as Aryans we live our lives in the transcendental aether, which we in the text describe. We present a new myth for the 21st ct. that can inspire people to contribute to the great cause. The tale of the Veda-dove is a tale of origin, identity, purpose and destiny. Meanwhile, it is a tale of the love and euphoria of our hearted lives – "the white day", which is the day of the heart, the aether. Furthermore, we intermix this tale with the tale of cosmic war against the forces of darkness, why we have incarnated unto the earth to fight this war. Life is lived in the spectrum of love and war, truth and deception, so we seek to cast a new light on world history and the purpose of existence, fx. by describing the modern day understanding of the Vedas, but also the Edda, which we have found to be integral aspects of the collective consciousness of the Aryan race and which we today meditate upon to gain insight into the true cause and nature of creation and existence. Regarding the aether, in the text we describe how we operate the aether by traveling between epistemic fields, we have constructed. We hope these tales will help good people understand the true nature of the Aryan race and the promise to all good people of a much better, spiritual world to come – a golden age – a new Atlantis.

**Author's preface and ethical clarification**

*This essay presents a spiritual and metaphysical vision concerning the destiny, lifestyle, and awakening of the Aryan collective as understood in the Hyperborean, Vedic, and Eddic traditions. All references to the Aryan race, nation, or future order are to be understood in a transcendental, esoteric, and poetic sense — relating to the inner development, spiritual purification, and cosmic mission of the Aryan soul — not as claims of political supremacy, racial exclusion, or historical ideology.*

*The vision described herein concerns the metaphysical and aetheric renewal of mankind — the restoration of truth, freedom, and divine order — and does not advocate or condone violence, hatred, or injustice. The future Aryan Nation and its institutions, as outlined in this essay, represent a spiritual and cultural ideal of Hyperborean life, not a political or racial program in the conventional earthly sense. The Hyperborean Doctrine affirms the liberation and enlightenment of all noble souls who seek the eternal order, regardless of earthly origins.*

**The Aryans and the doves – A myth for the 21st ct.**

What we wish to present is a myth for the 21st ct – a myth of the Aryans. It is the myth of the Veda-dove. The Aryans are the heavenly race and we are incarnations and reincarnations of the heavenly heart ('samsara' in Sanskrit, which means 'wandering' or 'rebirth'). While heavens is eternal, we have incarnated from heaven onto earth to fight the cosmic war against ontological alien and temporal evil. Therefore, we call our existence a transcendental journey of the triumph of the heart – this is the Veda and the reason for the title of this essay. The Aryans are not that many, contrary to what is commonly held – we estimate, that today we are no more than between 10.000 and 100.000 true Aryans, but we are the heavenly race – we live our lives in the transcendental aether, heavens, which we will return to later in the text. When we incarnated for the first time (we have etheric information, that this happened 48.000 bc.), we said: "Let the Aryans be doves, so we can strengthen our communication". The doves are our messengers and bring vibes, emotions, flow, knowledge and wisdom to the Aryan collective. What we call "the white day". The white day is the love, tranquility and serenity of the ethereal life and reality. The Aryans have etheric bodies, also called light bodies or astral bodies. We also posses the chakras of the etheric body and the etheric Kundalini-energy – a very powerful force, that one day will bring us back home, for there is a collective aspect of the Kundalini-energy. This is what it means to be an Aryan, for heavens is ethereal, spiritual, but all good people have a soul and dwell in the Holy Spirit. This knowledge of the Aryan heaven is the source of all wisdom-religion and mystery-schools, for it is the perennial philosophy, which fx. theosophy takes up. Theosophy teaches of the aether and the etheric body, so the information is not completely occult nowadays, though today this knowledge is being suppressed by the powers that be and considered untrue, at least not scientifically proven, but the aether and the Kundalini are absolutely real and as Aryans we know that the good man is first and foremost a spiritual being. When we rediscovered the aether in 2017, we were ecstatic. The Aryan elite of Denmark, the rest of Scandinavia and Germany is gathered in the Aryan Order (AO) and in the International Defense-force of Aryans (IDA). We see it as our mission to establish a new ethereal Atlantis, for all good people to participate in, for this is the life of the spirit, life of the heart. We don't agree with all of theosophical teachings, fx. that all mankind share the same origin and will return to the One (Blavatsky, 2007), for we believe in a ontological regime of good versus evil and evil is alien to life, near death. Furthermore, we don't agree that the One is impersonal, for the true pantheon is the whole of the Aryan race. This is the secret teaching of all ages and why Plato proposed the state to be ruled by a spiritual aristocracy of the elite philosopher-sages (the Aryan race) (Plato, 375 bc.). We find the myth of the Sky-Gods in all ancient mythology, fx. in the Vedas and the Edda, a notion the Aryans introduced to explain the heavenly, ethereal life of our race and the primacy of spirit in contrast to the material world. Nowadays, in modernity, we have seen "a deepening of materialism" and materialist explanations for life, but this development we consider "an entrenchment of the cosmic war". The Aryans are the muses of the Holy Spirit and protect and guide the good mankind by immortal will and transcendental deduction. The Aryans are absolutely good, for we are of the heart, by the heart and for the heart, but we cannot tolerate evil at all. Therefore, we live our lives as warrior-monks of the occult Veda-wars and this we call "the Veda white way". We live ascetic, vegan and in monastic recluse until that day, when we can step forth to lead the good mankind on the path towards our ultimate goal, namely *aufheben* – a term we borrowed from Hegel and which means 'upheaval', but for the Aryans this implies transcendence and ascension and not only a worldly, epistemological certainty. True spiritual enlightenment and liberation are ascension. The vehicle for this aufheben is the dialectics of the heart, which is true dialectics, and collective Kundalini-meditation. There is no negative dialectics, for evil should only be eradicated, not tolerated, for we believe in the eternal life. It is another way of saying, that the good is absolute and supreme and this we call "the totality of will".

**The Vedas today – A poetic-mythical worldview**

When the Aryans united back in 2017, we immediately knew the importance of the Vedas. During our collective meditations upon the Vedas, we have found that the Vedas are an integral aspect of the collective consciousness of the Aryan race and please remember, we are not that many true Aryans, so we know each other perfectly well. The Vedas are our foresight and visions of the cosmic war on earth between the forces of good (Agartha) and the forces of darkness (Shambala). The Vedas are a source of eternal wisdom and insight, but only the Aryans have access hereto. The rest of the good mankind can meditate upon the Holy Spirit, which the Aryans likewise represent: this is our communication with mankind. The Vedas give us insight into past, present and future and when we meditate upon the Vedas, we also call it "future transmissions", for as we say: "We are from the future". The tale of the Vedas, which we are privy to, we call: "the triumph of the heart", for it is the collective love of the Aryan race, that will carry us through the cosmic war and why we fly (in the aether). We also say: "It is a law that the heart will fly", which means, despite the war and having to confront evil, we will always love each other and we will forever be true to the aether, for that is the law of the heart.
In the AO/IDA, it is our plan to establish an Aryan Nation, which is to be a city-state located in Northern Denmark, where we can gather, chant, sing our songs, practice the aether and unite for collective Kundalini-meditation. Until that day, the Aryan elite, our commanders, plan to reside in Southern Norway in what we call Wolfenstein, for today Denmark is flooded with foreigners and the Aryans are very sensitive to the cosmic energies, so we prefer to stay together as far as possible and away from foreigners, who are not of the same spirit as we are. It is a race-mysticism and race-purity, which we have always professed. We are without a doubt the elite of the world, contrary to the celebrity culture, the idolatry, the world today is enmeshed in, for we are the true ideal, "the true, the good and the beautiful" – we are "the true man", which means that heavens, the aether, is true life as opposed to the illusion of temporality ('maya' in Sanskrit). When we are successful, which we will be, we will establish "a white world order", named after the blessed and serene day of the heart of heavens. This new order is to be based upon the true religion, culture and politics, aufheben politics, of the Aryan race – it is a new Atlantis – a golden age. This is the promise of the Vedas, having surpassed the Kali Yuga of war and strife.
"The Veda white way" is the modern-day lifestyle of the Aryan race. We are a tranquil and meditative race, who live our lives in the aether – this is bliss. We consider all existence "a phenomenology of spirit" (Hegel, 1807) and we dwell in the dialectics of the heart, for the highest principles of our theology are the mystical, tantric union of the Aryan man and woman and the poetics of the heart that it entails. Therefore, hermeneutics becomes important, for to understand who we are ourselves, we must understand the other counterpart of creation, namely the other Aryan gender. We rank poetics higher than even theology, so we can say that we are a poetic-mythical race, for we tell the tale of our divine love, heavens and our triumph in the cosmic war – it is a magical journey.
In the AO/IDA we have invented, what we call, a Veda-technique, for working with the Vedas. The Veda-technique consists of 3 phases: 1) meditating upon, 2) probing and 3) interpretation. When meditating and probing, we make use of, what we call, transcendental intuition and then the answers must be interpreted and discussed by the collective. When we fx. ask: "What can the Vedas tell us of the Veda-doctrine?", we are told that the Veda-doctrine consists of three aspects: 1) "a poetic tale of the triumph of the heart", which we have described as the cosmic war, 2) "a lifestyle", which we have termed "the Veda white way" and 3) "a Kingdom", which we interpret to be the Aryan Nation, we talked about earlier, but which primarily is the Kingdom of Heavens or the ethereal kingdom of the Aryan race that we call "Heartland". This is our way of working with the Vedas, which have given us many clues to the cause and nature of creation and our transcendental journey of the present day.

**The aether, visualization and "the other side"**

We are Aryans, which means we meditate upon and live our lives in the aether. The aether is true life of the Aryan race. It is by the aether we have our emotions, first and foremost, for the aether is the truth and law of the heart, but also our knowledge, epistemics and wisdom – our reason. We are truly a transcendental race. This is completely opposed to the so-called "modern episteme", that is purely materialist, rational and atheist. Emotions are in the modern episteme almost consider a deviance of uncontrolled chaos, something that needs to be medicated. Under the Neo-liberal/Marxist regime, when you are euphoric or ecstatic, for this is the nature of Aryan race-mysticism, you have to be locked up in an asylum and forcefully medicated with anti-psychotic drugs. What a hell that is. The modern liberal state fears the Aryans, for we are the promise of a much better future – a golden age of spiritual enlightenment and liberation from the bonds of the temporal, material world. This is the point of the aether. The Aryans are the true devotees, the thousand points of light, for we worship "the white day", which is the day of the heart. The reason, why we are euphoric and ecstatic, is because of our great love for one another and the reality of the transcendental aether, wherefrom we have all our emotions, vibes, flows, atmosphere and "stimmung", for we are a transcendental collective, so for us, it is all about being true to the cause of heavens – the great cause.
We have to inform, that in our deep and prolonged meditations, exactly how the original Vedas were discovered, we have found that the reason for the fierceness of the Second World War was caused by the National-Socialists discovering an international nefarious plot to attack the holy Aryan race with weaponized Tesla-technology. The ancient Greeks considered the aether a fifth element (Blavatsky, 1877) and Nikolas Tesla (re-)discovered the aether in the beginning of the 20$^{th}$ ct. (Vassilatos, 2000). This knowledge was taken over by various black projects and turned into weapons. This is most present today, since the Aryans have etheric, light bodies. It is truly a cosmic war. "The evil ones sing no songs", as Nietzsche said (1885) and we have come to conclude that, ontological speaking, evil people have no relation to life – they are (near) death. We are fighting those that "have become like death", as Oppenheimer stated. The modern liberal/Marxist state suppresses the collective emotions of the Aryan race – our love and the state persecutes the magical, occult capabilities of the Aryans. What could be more evil, than to attack the etheric light bodies of the Aryan race. So we are fighting Tesla-towers.
But to return to the main purpose of this section of the paper, it is to define the etheric life of the Aryan race, so that we may give an insight into how we live our lives. Though first we will continue the development of a myth for the 21$^{st}$ .ct. We have further occult information, and some of us have direct experience or visions hereof, that we must understand reality in a tripartite way: 1) there is the transcendental aether, which is good and Aryan, 2) then there is the physical world and 3) there is, what we were told in the aether was, "the other side", where auras, either vibrant white of good people, very colorful of Aryans or very dark of evil people, could be seen. Furthermore, we have experience during so-called "breakthroughs", that there were strange, demonic script on buildings and ships. We have to say that this is still just a "working thesis". We know the aether is true, but we are still skeptical of the veracity of this third "negative" dimension of existence. For sure, the Aryans belong in heavens and the aether and we have no relation to this other side, why we can't see this other dimension in our natural state, but it is interesting to note and we find that we must inform the public and academia of this marked ontological difference between good and evil. "Break on through to the other side", as Jim Morrison of The Doors sang. Also, The Doors have their name from the Aldous Huxley book called *The Doors of Perception* (1954). But for sure, the Aryans have broken through to the primary and good side of existence, which the aether is, for the aether is pure and absolutely good – the aether is pure spirit, pure being. Black magic, evil interference, is feverish hallucinations and have no substantial reality – mere shine, but is annoying and should by all means be fought off, which we always do.

**Epistemic fields of the ever**

But we live our lives in the aether, which means, we have a duty, an obligation, to protect and develop the ethereal life. We do this by collective meditations. When I visited India some years ago, I spend time in Dharamsala, Himachal Pradesh, where the Tibetan Buddhists reside in exile. There I participated in a course with the Dalai Lama and we spend time visualizing the aether and different Tibetan deities. It was called “clearessence”, a word I haven't been able to look up, but which I presume means 'clear essence', that is, 'truth' and 'serenity'. I was 22 and it was my first insight into the aether, but the aether is always alive, for it is from the aether we have our emotions etc., for the aether is the truth of the heart. So we are always alive, but even the more now, when we in the Aryan race have decided to collectively explore the aether, for the aether is our natural habitat. In the aether, we especially spend time on developing “the episteme”, as we call it, and “the existentiale”, inspired by Heidegger's (1927) contemplations. We have developed a technique for doing this, which centers on developing “epistemic fields”. We do this by visualization and then we, during the day, travel between the different epistemic fields, we have developed, to further our mission, and we “discourse” upon our wisdom. Each field, which is a scenario, fx. buildings we have build in the ethereal Aryan Nation or retreats in nature, camps and so on, we associate with certain concepts, which we write “on the wall” (the etheric wall). Of course there is depth to the aether, for the aether is perfect, and the depth is our emotions and feelings, the vibes and the atmosphere, that these scenarios bring to the collective. It is a deeply spiritual, mystical worldview and experience, but we are truly a collective. The epistemic fields are “semantic strongholds”, where we connote truth and affirm our love and dedication to the collective and our shared origin and destiny. We are a tribe, as we say. We pray and have thanksgivings for our love and the mysteries of creation, heavens. We pray for “the light” and that we may be victorious in the battle against the forces of darkness, reaching our ultimate goal, aufheben – the religious upheaval of all good people for the eternal life. Meanwhile, we plan for establishing the new Atlantis and “the white world order” with all our allies. Fx. we have developed an epistemic field for the concept “Veda-Dove”. It consists of three terms: 1) “the white vow”, which means the Aryan oath to fight off evil and reach aufheben, 2) “halo”, for we literally get a halo around the head, when we meditate, but always and 3) “aufheben”, for that is our ultimate goal and the destiny of the Veda-dove. We will list the three terms, to represent how we do in the aether, where we write in capital letters:

**VEDA DOVE**

1. THE WHITE VOW
2. HALO
3. AUFHEBEN

All in all, this epistemic field means a lot to us and it is where we go, when we want to remind ourselves of our mission and our destiny – the transcendental flight towards our homeland – Ultima Thule.

An other epistemic field, which means a lot to us, is “the Warheart”. We will list the terms associated herewith. For the Warheart episteme we are situated at “Idasletten”, a term from the Edda for where the Æsirs gathered for council. The Warheart is our existentiale.

**WARHEART**

1. THE CALL (HERO/SAVING GRACE)
2. WAR OF THE HEART
3. IMMORTAL TEAR
4. THE WAY
5. THE EXISTENTIALITY OF WAR

**The flight – A transcendental journey**

But it was warfare. Even though we are utmost happy with our lives, we cannot ignore the warfare. Therefore the Warheart existentiale. We wish all good people the best and good luck, but all good people must realize the cosmic war against the forces of darkness, the people of Shambala. Karl Haushofer, the german military strategist, said that the people of Agartha and the people of Shambala had the same origin in the ancient Atlantis. So does theosophy claim that all mankind share the same origin and destiny. This we find not to be true. There is an ontological difference between the good and the evil and we don't share the same origin or destiny with evil. Evil must be eradicated in cosmos, for we tell you, true ontological evil is extremely gloomy and dire – nothing that could ever be tolerated or accepted by good people. We know this, for the more we have become awake, the more we are experiencing black magic attacks in the occult and physical violence in the temporal world. Freemasonry and the Illuminati propose a "humanitarian and cosmopolitan universal tolerance" (Koselleck, 1959), but this is like letting the devil run free, the devil, which has as its goal to enslave mankind in the bonds of the material world, upholding the illusion, denying mankind its spiritual, transcendental potential. Rather than agreeing with Haushofer, we agree more with Jörg Lanz von Liebenfels, the Austrian ariosophist, that the Aryan race is "the divine electron", with plenty of supernatural capabilities. We describe some of these capabilities in another essay (Riis-Søndergaard, 2024a), fx. the Vril-energy. But it is a flight, for we belong at home (heavens). We are pure love and love each other tremendously. We are the ideal life, for it is a spiritual life of the heart. The Neo-liberal/Marxist world order has no concept of race, spirit, soul, beauty, righteousness, pride and order, not to mention the aether, the mystical, the occult or heavens (Riis-Søndergaard, 2024b). They are simply atheist and materialist to the point of nausea. They even deny that the Aryan race exists. Therefore, it is war – Third World War – a war of faith and epistemics, for it is a battle for the hearts and minds of men – the soul of good people (Riis-Søndergaard, 2024c). The modern liberal state does all it can to prevent the Aryan race from gathering and living our lives. Even though they deny the aether, they still attack us in the occult and some of us have experienced that they attack our crown-chakra and light bodies with weaponized Tesla-technology. So it is an occult war. We were even told, during our awakening, that these Tesla-towers were build on the so-called, previously described, "other side", which makes the situation even the more grievous. We will never tolerate aggression against the Aryan Nation or our allies. We will never waiver in our spiritual pursuits for enlightenment and liberation and since the aether is transcendental, they can never lay hands upon our existence.
Even though we wish to only occupy ourselves with the aether, we find that we are constantly under attack from the forces of darkness – be it in the physical world or in the occult. Therefore, it is the right strategy to live our lives as warrior-monks, concerned with bringing about "a white world order" of the day, of the heart. This is our mission and we wish to garner all the support we can get from all good people. For that, we have established The Atlantian Ministry, which will teach and guide good people in our religion and mission – the doctrine of "the white order", named after the blessed and holy day, as opposed to the darkness and oblivion of the present Neo-liberal world order that offers no promise of redemption and salvation, but only endless egoism and worldliness. Our goal is to construct a new world order, supportive and protective of the Aryan cause and for this we need all good people to wake up. We have allies in the US, Russia, India and Japan, as well as South America, not to mention in our homelands, where our natural allies are the Nordic and Germanic people, so we have all the world before us. It is the promise of a new, spiritual golden age of the good mankind, with the prospect of aufheben, which can be accomplished, when the Aryans are again united in the Aryan Nation, having overcome the evils of the temporal world. Thank you and good luck and thank you for the contributions to a new and just world order – Aryan justice.
