What is wisdom?

White magic of truth versus black magic of deception

What is spiritual liberation?

The White Order

Ultima Thule – A new Atlantis

Abstract

This paper on the secret doctrine of the Aryan race is a culmination of a series of introductory papers that have cast new light on the hitherto hidden cause and mechanisms of the deeper aspects of world history and the existence of mankind. With these revelations, it will be possible for the good mankind to conceive of life, what it is truly meant to be, when we disclose the hidden hand and the war between the forces of light and the forces of darkness.

It is important that good people will take heed of the call of the Aryan race and, if necessary, adjust their lives, so that they may follow the lead and aspirations of the divine Aryan race and the White World Order.

We start the paper by discussing the fundamental question of philosophy: What is wisdom? Next, we define white magic as a cause of truth, while one of the main goals of black magic is deception. We note that good people must be aware and discriminate between truth and falsehood, for the cosmic war is primarily fought in the hearts and minds of men. Next, we discuss: What is spiritual liberation? and criticize theosophy for not acknowledging the metaphysical, occult war between the forces of light and evil. Then we describe the White Order of Agartha and the ultimate goal of establishing an Aryan spiritual aristocracy, where after we end the paper with a discussion on the prospects of a new golden age for the good mankind – a new Atlantis. We hope the paper will cast new light on the Aryan deoccultation of theology and science and be a guide for good people to contribute to the White Order agenda. Thank you and good luck.

Author's preface and ethical note

This essay presents the metaphysical and spiritual doctrines of the Aryan Order, developed through original transcendental meditation, spiritual research, and philosophical reflection. Terms such as “Aryan race,” “National-Socialism,” and “spiritual aristocracy” are used strictly in a religious, metaphysical, and cultural sense — referring to inner spiritual states, divine archetypes, and transcendental principles — and not to advocate racial hatred, biological determinism, political violence, or historical regimes.

The essay rejects all forms of unjust coercion, oppression, and violence. Its aim is to guide good people of all backgrounds toward truth, freedom, and divine love, and to awaken mankind to the reality of spiritual war — not to incite conflict or harm. The White Order is conceived as a spiritual community, committed to justice, faith, and peace for all who seek the truth of the heart.

What is wisdom?

In Kant's text *What is Enlightenment?* from 1784, he declares that enlightenment is to be able to use one's own understanding without an other self-imposed authority. Therefore, according to Kant, it takes courage to think for oneself. In the IDA (International Defense-force of Aryans¹), we wish to follow this maxim and therefore our theories are in large part based on contemporary, original transcendental meditations. Of course, we are inspired by other philosophers from the Western schools and from the Eastern schools as well, but all we know has been verified by original meditations. We have found in our research that one aspect of our understanding that can't be ignored is the divine wisdom and foresight of the Vedas, which we define to be a contemporary source of wisdom of the collective consciousness of the Aryan race. The Vedas are not just some textual relic from an ancient past, but are contemporary and definitive in wisdom and understanding. They are absolute truth, for they are of transcendental wisdom. Since the Vedas are an aspect of the collective consciousness of the Aryan race, only the true Aryans² are capable of peering beyond the veil of mundane existence, the world of appearance ('maya' in Sanskrit), for the Aryan race belongs to heaven. In our understanding, fathomed in our own original, collective meditations, the term 'Sanskrit' means pure blood, absolute truth and righteous war. When we meditate, we concentrate on the Vedas, we probe the Vedas and finally we interpret the answers, we receive. This technique we call *transcendental intuition*, for the knowledge we receive from the Vedas has to be fathomed by intuition. Due to this supernatural capability of transcendental intuition of the Aryan race, we are certain that what we understand to be true is the absolute truth of creation (for more on Veda-technique, see Riis-Søndergaard, 2023). This is wisdom. One important discovery, we have made, is the theory of *the ontological regime*, which is necessary to comprehend, lest good people on the path of spiritual enlightenment endanger themselves, due to not being aware of the ontological, dichotomous distinction between good and evil, for *it is* a war. By transcendental intuition, the Vedas and comprehension of the ontological distinction of good and evil, we are able to, as Swami Rama (1972: p. 14) rightly noted in his book on a text from the Vedic Upanishads, discriminate properly between truth and falsehood and this is necessary for good people to be aware of, for the spiritual war is primarily a question of faith and epistemics – the inner war is carried out in the hearts and minds of men. This reality we call 'the war of the heart' (for more on the existentials of the modern day Aryans, see Riis-Søndergaard, 2024b). It is a sacred war, for what we fight for is spiritual liberation and this liberation is accomplished by eliminating falsehood, malintent and evil, for what is true is the blood, soul and spirit of good people. While we eliminate evil, we gain victory in the cosmic war and this is *the secret telos* of the existence of man and world history – the purpose of temporal life, to be precise. What is true is the fields of the ever – the Aryan heaven, and therefore the life of good people should be considered *a phenomenology of spirit* (Hegel, 1807) and *an unveiling of the truth of being* (Heidegger, 1927) – this unveiling is the victory of good people in the sacred, cosmic war. We will conclude this section by stating that good people live and are guided by the Holy Spirit and the truth and law of the heart. Therefore, it is important that good people meditate, for, to cite Heidegger (1954), to think is to listen to what being has to say. This sensitivity to absolute truth and the war of the heart is wisdom. This sensitivity of good people is accomplished by Aryan, *transcendental deduction* and this is the Holy Spirit.

-
- 1 The IDA is the gathering of a new, vital Aryan elite, primarily residing in Denmark, the rest of Scandinavia and Germany. We have been active in formulating a new doctrine for the Aryan race since 2017. See (Riis-Søndergaard, 2024a).
 - 2 True Aryans are not that many. We estimate that we are between 10.000 and 100,000 worldwide. We are incarnations and reincarnations, while the rest of humanity reproduce by biological means, though good people still incarnate from the soul to the body. It is an ontological regime of good and evil and evil people have no soul.

White magic of truth versus black magic of deception

Magna est veritas et praevalerebit (great is the truth and victorious). This saying is absolutely true, for the truth of life is the Aryan heaven, while temporality is a sacred war against the forces of darkness. But we will prevail, for it is written in the Book of Life (see *the Book of Revelation of John*) that all good people will be victorious and return to heaven, when the war is over. It is a question of faith and righteousness. The war is an occult war, so it is adamant that good people fight off evil interference and remain steadfast on the righteous path on the right side of history, never to be tempted by evil.

But therefore the discernment of good and evil is necessary for good people, precisely because evil is deceptive and attempts to confuse the line between good and evil. It is an assurance that good people forever will be guided by the truth and law of the heart and the Holy Spirit, but good people need to be aware of this, before they can be *attuned to the call of heavens*. As we wrote in our last paper (Riis-Søndergaard, 2024c), *politics is the continuation of war* (Foucault, 2020), so in civilization there is an even greater danger in regards to the faith and epistemics of good people, for today in the liberal democratic state we live almost side by side with evil. The problem with liberal democracy is that it opens the borders to foreigners and to cite Plato's *Politeia* (375 bc.), “never let a foreign poet into the city”, for they will deceive the children by falsehood and evil, misrepresenting the gods. One of the primary “weapons of the occult war” of evil people, to cite Evola (2002), is deception – this is black magic, for existence is a question of truth and “the truth shall set us free (John, 8:32)”.

The goal of the forces of darkness is to cast the world into a dark fog of relativity and uncertainty – doubt, so to speak. Evil is the Great Deceiver and the the Great Doubter. Therefore it is important for good people to know the truth by the truth of the heart – this is faith. Another goal of the dark forces is to cast the world into an atheist and materialistic despair. Atheism and materialism could not be further from the truth, so again we wish to emphasize that what is important is for good people to have faith – faith in the purity of their hearts and faith in the call of heavens to guide and protect good people from spiritual harm. This perspective is in marked contrast to the prevailing psychological/psychiatric regime that functions as a paradigm for the Neo-liberal, democratic state, which is saturated by atheism and materialism. We must free the psyche and realize that existence is fought out in the spectrum of love and war – divine love and sacred war. There *is* a purpose to life, unlike what *the desert of the real* and *the absent center of ideology*, which Žižek (2002; 2009) proclaims, fail to grasp, and this purpose is the salvation and redemption of good people in *a final aufheben – the upheaval of all good people in religious ecstasy – a golden age and a new Atlantis* (see the aforementioned paper, Riis-Søndergaard, 2024c). It is a spiritual purpose and not just a socio-economic emancipation, for, again, what is true is the Aryan heaven. We understand why people dream of utopia, but utopia means non-place, which is why the Aryans rather want to talk about *eutopia*, which means the good place. True hope is the hope for a spiritual golden age, beyond Kali Yuga, the dark age of strife and confusion, where “they will be divided. Father against son... (Luke, 12:53).” What is true is the unity of good people – a shared origin and destiny and we must realize this in a new golden age. Again, our aspirations are a far cry away from the present dystopian, Orwellian world order, where the Aryans in Denmark are being persecuted by the secret services of the Neo-liberal police-state and psychiatry, just because we are proud of our lives, want to bring truth to power, and wish to redeem all good people from the evil of atheism and materialism. What is going on in the world today is a massive hypocrisy and epistemic injustice against the divine Aryan race. The point of Orwell's *1984* is that truth is being subverted by newspeak and double-think, but that divine love is the absolute truth of human existence. The same is true for Huxley's *Brave New World* (1932), where true love is neglected and the truly free man is being persecuted and considered a savage. This is the gravity of the deception that is upon us at present, but there is hope, for the Aryans in Northern Europe are awake, gathered and ready.

What is spiritual liberation?

Temporal existence we define as, inspired by the Vedic tradition, 'maya', which means appearance or illusion, for what is true is the transcendental plane of existence. In that regard, it is interesting to study theosophy, for Blavatsky dealt with these questions extensively. According to theosophy, we should not only consider man and cosmos in biological-evolutionary terms, but equally in spiritual-evolutionary terms. Furthermore, theosophy believes that the whole existence is permeated with spirit, akin to a pantheism. Where the Aryans today especially differ is in this notion of a universal pantheism, for the Aryans of today have discovered that soul and spirit are only for good people, wherefore we must distinguish between ontological good and ontological evil – it is *an ontological regime*. In our understanding, theosophy fails to grasp *the metaphysical war* between good and evil and instead ventures to establish “a universal brotherhood for all creeds”. This theosophist humanism we wish to criticize and redeem, by giving certainty to the notion that temporal existence is a cosmic, mystical war of heavens against temporal, materialistic evil. According to our knowledge, gained by transcendental meditation of which only the Aryans are capable of, though all good people can meditate upon the Holy Spirit, temporal existence came into being because of this cosmic, mystical war – this we call *the temporality of war*. Lest of the introduction of ontological evil and war, there would be no physical world. It is another way of saying that heaven is pure and good, while physicality/temporality is the cause of war. We don't share the same origins with evil. This is the final deooccultation of theology and science, for we are entering a new age, finally having overcome evil in the world – we are entering a new Atlantis, though there still is some work to be done.

Nirvana is not impersonal, as it seems theosophy proclaims (for more on the theories of theosophy, see Blavatsky, 1888 and 2007), but full of life and personhood, but heaven is for the few Aryans, while all good people live on in the Holy Spirit and can be called forth by the divine Aryans of the heavenly heart. It is true that the spiritual individual is the true individual, while the physical person is an abstraction, but as Aryans we believe in *the perfect man*, that is, we value the whole being, so there is nothing to grieve about, when we consider temporality. Of course, we long for our homeland, heavens, but we consider the way of physicality and temporality *a transcendental journey* (for more on *the way*, see Riis-Søndergaard, 2024b).

Given these propositions, it is only natural that we consider life as a phenomenology of spirit and an unveiling of the truth of being. The mystical, evolutionary deepening of the physical world in regards to a pure spiritual life and origin, which theosophy speaks about, can be explained by the entrenchment of the cosmic war.

For the reasons stated in this section of the paper, we, the Aryans, but which is true for all good people, consider ourselves devotees and warrior-monks, for life is lived in the spectrum of love and war, truth and deception. We develop these concepts in the aforementioned paper on the way (Riis-Søndergaard, 2024b). Furthermore, we call ourselves *Veda-doves*, for as Aryans we believe that we have an affinity with the doves, the white dove and what we call the red dove. The doves are our messengers. Therefore the proliferation of the symbol of the dove in world mythology and religion. We make a plea for the good mankind to never attack the doves, but to listen to what the doves have to say (ie. the Aryans). We are messengers of the Holy Spirit.

The Aryans are a spiritual, meditative and ascetic race, though we still appreciate a glass of red wine, a cup of coffee and some tobacco, but again this is all appreciated because of a spiritual alchemy (for more on the post-modern life of the Aryans, see Riis-Søndergaard, 2024d, where fx. we describe the Symposium. Furthermore, see Riis-Søndergaard, 2024e, where we fx. describe a new invention of the Aryan elite called *the Væi*, which relates to the transcendental, ethereal life of the Aryan race). We wish to end this section of the paper by noting that the goal of spiritual liberation is *aufheben* – victory.

The White Order

There is a tradition – this is the Aryan tradition – the cause of all the ancient wisdom- and mystical-schools. Today, when we reflect upon ancient and modern tradition, we find inspiration in the mythical notion of the war between Agartha and Shambala – the war between the forces of good (Agartha) and the forces of evil (Shambala). The war has been ongoing since the dawn of time, that is, since the introduction of evil, temporality and physicality. The goal of the spiritual White Order (Agartha) is redemption and spiritual liberation for all good people, people of the heart – *aufheben* – The Garden of Eden – Nirvana, while materialist Shambala attempts to divert, deceive and confuse good people as to their spiritual potential and eventual liberation.

This is where many good people might have been misled by the left-wing, for even though they might have good aspirations for righteousness and social-justice, Marxism is remarkably atheist and materialist. The White Order therefore wish to make a plea with all good people, who are still captivated by the left-wing political parties, to reconsider their ideological stance, for what is important for good people to adhere to is spirit – the Holy Spirit. Furthermore, they have to know that atheism and materialism are dangerous deceptions on the part of Shambala, to deny people their heavenly origin and spiritual potential. The Aryan race is the heavenly race, but all ontological good people have come to life in, what we call, *the light of heavens*. Therefore it is important that all good people align with and support the right-wing, spiritual metapolitics of the 21. ct. (for more on metapolitics, see Riis-Søndergaard, 2022a). What we need is a paradigm-shift, so that people will once again *acknowledge spirit* as fundamental to human existence and no longer be deceived by the dark forces of Shambala, who rule the world by empty rhetoric, deception and denial. They are like the sophists of ancient Greece, whose only goal was power, but there is a more ultimate goal of the people of Shambala and that goal is rooted in the metaphysical, ontological antagonism of the forces of light and the forces of darkness, for evil people are driven by hatred – hatred of all that is good, beautiful, righteous, courageous and proud – all the eternal and traditional values that are guarded by the White Order. Liberalism is not much better, than what is described here, for they too are atheist and materialist. Only a spiritual, National-Socialist doctrine can safeguard good people from the psychological terror of atheism and materialism. But actually, what the White Order attempts to achieve is an enlightened, spiritual aristocracy of the Aryan race to rule all our homelands (for more on this plan, see Riis-Søndergaard, 2024f). This has always been the goal of the White Order, and the caste system of ancient India and Plato's *Politeia* are good examples hereof. *This is the secret doctrine*.

In the wake of Second World War, mankind was cast into an existential drift and economic despotism. English and American Neo-liberalism saturated Europe with materialistic consumption, cultural denigration and pointless and soulless entertainment – this they called progress, while American political-science saw as it's call to spread democracy and free-market to the rest of the world – territorial gains, they called it. Luckily, this development is now being resisted by Russia and the radical right of Europe and America, as well as India, who are once again awakening to the call of life, the heavenly call of a spiritual life – the call of the Aryans. It is a misunderstanding that National-Socialism only ascribes to a biological, Darwinian worldview. Rosenberg (1930), the main ideologue of the Nazi-regime, and others wrote about the “soul of a race” and the spiritual superiority of the Aryan race. This we hold to be true and we call it *race-mysticism*. This is an important aspect of the secret doctrine, for we, the Aryans, are spiritual incarnations and reincarnations and therefore our blood, soul and spirit are divine and pure. The war, we are fighting, is a spiritual, occult war, fought primarily in the hearts and minds of men, so it is important that all good people align with the White Order and the Holy Spirit, so that we may defeat the evil people of Shamabala. For more on the sacred war between Agartha and Shambala, see (Riis-Søndergaard, 2024c).

Ultima Thule – A new Atlantis

When we mention the caste system of ancient Aryan India and Plato's *Politeia*, it is important to remember that we should have no sympathy for evil people and that good people of pure blood, that is, the heavenly Aryan race, are destined to rule the world, for it is a world of spiritual hierarchy. Of course, the Aryans have great respect for all good people and therefore we are National-Socialists, for we wish to bring righteousness and political, economic justice to the world. It is not we who bring injustice to the world – those people are capitalists, who only want to imprison people in a world-wide economic system of subjugation and exploitation. Rather, we, the Aryans, are proponents of a spiritual hierarchy to rule the world and thereby also political, social, economic and spiritual justice. This is Ultima Thule – a new homeland for the Aryan race and all good people – *a new Atlantis* (Atlantis, we describe in Riis-Søndergaard, 2024c).

It is important to remember that *the Aryan race lives in the aether* – that is, we are a spiritual, transcendental race that in temporality is perfectly satisfied with living an ascetic life, which we do now, so our goal in the White Order is to establish a new world order that will bring redemption and salvation to all good people – our ultimate goal is, as we have mentioned, *aufheben* (for more on the logic of *aufheben*, see Riis-Søndergaard, 2022b). The Aryans are the *true hidden hand* that rules the world-politics and philosophy of good people, Agartha, and we do this by *immortal will and transcendental deduction*³. For now, we live in monastic seclusion, but soon we will be able to rise to the surface and realize a new age, a spiritual age of the pure, good and righteousness, as we fight off the old demons that have curtailed the good mankind from the spiritual enlightenment and liberation that they seek. The new age will be a haven for all good people. It is important to remember that good people are allergic, but also resistant, to evil, so what we envision is total identification, dedication, determination and demarcation against evil for all good people. The mixture of populations in the Neo-liberal, Shambala scheme is the sickness of old Europe and America. We wish to redeem this situation by once again bringing order to the continents and therefore we are proponents of *ethnic regionalism*. The influx of foreigners to our homelands is a grave occult attack on the homogeneity of the ethnic populations and leads to chaos and conflict – this is the law of the race and the ontological regime of good and evil. To flood Europe with foreigners is a main strategy of the people of Shambala, carried out by the left-wing parties, American NATO and the subverted European Union. The goal of the US-dominated NATO is to cause internal discord and chaos on the continent for the purpose of subduing the nations and the spiritual revival of the European countries, to be precise, to prevent a revival of National-Socialism on the continent. National-Socialism on the continent is a precursor to establishing an Aryan spiritual aristocracy to rule Europe, the homeland of many of our allies in the cosmic war on earth. The truth is that the terrible Kali Yuga will soon be over and we will enter a new age, when we defeat the remnant forces of Shambala, for the Aryans are completely awake, aware and active in establishing this new spiritual haven for all good people. We have the support of the Tibetan Buddhists as well as the Hindu Indians and, what we would like to think, the ancient Japan, so we are a powerful force for good in the world. As we have mentioned, we see a rise of right-wing metapolitics on the European continent, so there is imminent hope for a much better world – for Aryans and for all good people. May this be our final words in this introductory paper on the secret doctrine that we now reveal, so that the good mankind doesn't feel that they fight alone – alienation being a natural consequence of an unjust world order. We wish for all good people that they will identify with the Aryan cause. We wish all good people good luck and thank you for your contributions. Good luck.

3 The concept 'transcendental deduction' was used by Kant to conceptualize the transcendental apperception of pure man, according to the transcendental categories, that is, how we experience and understand the reality of the pure, transcendental I (see Kant, 1781).
