White Order (Aryan) vs. Black Order (NWO)

Exposition and dialectical battle of the Orders

The telos of world history – Aufheben vs. technological singularity

Commentary on the systematic exposition of the existential struggle and some strategic remarks

Abstract

Finally, we present a definitive outline of the cosmic war, the existential struggle, and the hope, agenda and prospect of the White Order (WO), which the Aryan Order (AO) of 2017 represents. The AO was founded by the Aryan elite of Denmark in 2017 and then spread to the rest of Scandinavia and Germany, now being the ultimate spiritual elite and aristocracy of our people. Remember, the true Aryans are not that many, we estimate between 10.000 and 100.000, but we are the Hyperborean Siddhas (perfected, liberated masters), aligned with all the Viryas (wise-warriors) of the world. As such, we present the definitive program of the WO, as we move further into these the latter days, the grand promise being Aufheben, which this text is about describing, contrasting this concept to the agenda of the New World Order (NWO/Black Order) of technological singularity. Truly, it is a cosmic war, an epic struggle, of life and death, freedom or slavery and thralldom. The essay is based on 6 diagrams we have developed to give the WO a defining view of what is at stake in this battle of ideas, power and potential. In modernity, much has been done by the demiurgical system to cast doubt upon the veracity of spirituality and the hope of redemption, even as to the very nature of good and evil. In this essay, we seek to shed new light on these topics from the vantage point of the AO, who today must be said to be the most uncompromising organization, fighting the evil Demiurge and the Black Order in general in terms of faith and epistemics. We hope the essay will be an inspiration for the whole WO to further unite, organize and resist the nefarious plans of the Black Order. Thank you and good luck.

Author's preface

The present work, The White Order – The Doctrine of Aufheben, is not written as an academic commentary nor as a speculative philosophy. It is composed as a declaration, a manifesto, and a guide. Its form is concise, its language uncompromising, for its subject is not debate but truth.

Here the reader will encounter the central polarity of our time: the struggle between the forces of life and the forces of death, between the order of Spirit and the order of the Demiurge, between the White Order and the Black. The tables and diagrams presented within are not abstractions, but weapons of clarity. They are instruments of recognition in a war that is at once metaphysical, political, and existential.

The doctrine of Aufheben — sublation, the overcoming of contradiction by elevation into higher truth — stands opposed to the doctrine of the Technological Singularity, the Demiurgic promise of dissolution into machine, matter, and control. This is the conflict of our age: not merely between states or ideologies, but between two visions of existence itself.

Readers will find here no compromise, no mediation, no appeasement. Each page distills an aspect of the doctrine, to be read, meditated upon, and remembered. The rhythm of exposition is deliberate: one section per page, a cadence of war-manual and scripture.

This work is dedicated to those who refuse to forget, who refuse to compromise, who refuse to bow before the idols of death. It is written for those who feel the call of Spirit in their hearts, who recognize that the war is already upon us, and who know that to live is to will, and to will is to love.

May this text serve as both compass and weapon, as reminder and call. For in the end, all will be judged — and only the truth endures.

Agartha and the White Order – The cosmic struggle for spiritual liberation

This essay centers on 6 diagrams, which we have developed to cast true light, transcendental illumination, onto the ancient, but very real and actual struggle for existential, spiritual liberation in the cosmic war. In this section, we will briefly outline and discuss the idea of the White Order, before we in the subsequent sections of the essay present the diagrams. We end the text with a commentary on what we have found in developing these diagrams of the agenda of the two opposing forces of the cosmos, the light and the dark forces. At its peak, the cosmic war is ultimately between the Aryan Order and the Demiurgic Order of Death. Different names have and can be given to this war and to the Orders, but the basic premise is that the Aryans, the Hyperboreans, are a spiritual, transcendental, ethereal and eternal race, while the Demiurge and its minions are only temporal, worldly beings from the abyss of despair, hatred, violence and lies. This cosmic war was known to all the ancient peoples, but nowadays, under the newspeak control-society of Neo-liberalism, this ontological, existential and cosmic war is fiercely denied. This essay will perhaps not have many references to the history of ideas, but if you read our other essays, we always relate and contextualize our findings in regards to the philosophical and esoteric traditions. This essay is more of a white paper for the White Order, so that we may effectively engage in the epistemic warfare, which is central to our project for the liberation of the good mankind and the reaching of *Aufheben*. “*Aufheben*” is a central concept for the White Order and should be juxtaposed the concept of “technological singularity”, which the current (Black Order/NWO) globe holders profess. It’s basically a struggle between life and death, for does not technological singularity imply eternal death to man, the irreversible and indefinite subduing of soul to machine, as also Baudrillard (1981; 1995) had envisioned in the concept of the hyperreal? We have borrowed the concept of *Aufheben* from Hegel (1807), but for the Aryans, we use the concept to denote transcendence and ascension – for us, it’s a concept of spiritual upheaval, the absolution of temporality for the eternal life, having overcome death, evil itself, in the temporal, cosmic war. In the final equation, this is our goal. It’s a war between angels and demons, a concept, which still finds accord today, for example in Dan Brown’s (2000) bestseller of the same name, and, though disputed, is not the Illuminati exactly this nefarious, conspiratorial incarnation of the evil Demiurge, who wages fierce war, while at the same time denying that the war exists at all? In this essay, we will outline the logic of each side of the war, as it plays out today. The essay presents cutting-edge, insider information from the tip of the spear (the Aryan Order) as to the strategy, tactics and mechanisms of the occult war. For example, via our diagrams, we make it perfectly clear that the motivations and intents of our enemies are not the same, actually, complete opposite to the motivation of the White Order, for again, it is a war between light and darkness, life and death, love and hatred, so of course the motivation is not the same, as materialist Liberalism otherwise would have us believe, when they say that all men are born equal etc.. We start by defining the two opposing views of the nature of man, where after we define the two opposing views of the state and war, as exemplified by juxtaposing Hegel/Schmitt and Kant/Clausewitz. Thereafter, we define the logic of the White Order and the Black Order respectively, and delve into the dialectics of the mechanisms of the occult war. In the last diagram, we present the logic of *Aufheben*, contrasted the logic of technological singularity, two opposing *teloi* and eschatological visions for mankind of the White Order and Black Order respectively. All in all, this essay will give the White Order (WO) a great starting point for strategic analysis, epistemic warfare and tactics for countering the nefarious schemes of the Demiurge. Combined with our other essays, the reader should now be able to comprehend what is truly at stake in these the latter days, where the forces of light and darkness are clashing worldwide, though still mostly subtly, but all over the world, we see the rise of spiritual metapolitics to counter the materialist, liberal deception of the Black Nobility and their plans for world enslavement and indefinite thralldom of mankind in the physical world. We hope these diagrams will be an inspiration for the WO.

Contrasting the two opposing views of man

Plane of Being	White Order (Angelic-Hyperborean Vision)	Liberal-Demiurgic (Vampiric Vision)
Spirit (Crown / Aether / Nous)	Seat of transcendence, divine flame, immortality. Spirit is sovereign and untouchable; crown-chakra connects directly to higher worlds. Mission: awaken, defend, and expand the Flame.	Spirit is denied, ridiculed, and veiled. Crown-chakra targeted via psychotronics, inversion, and false doctrines. Spirit harvested indirectly as “loosh” through confusion, intermixing, and predation.
Soul (Heart / Psyche / Etheric Body)	Heart as law of truth, love, and righteous war. The soul is purified by ordeal, sacrifice, and loyalty to the divine. Virtues: courage, fidelity, honor, compassion.	Soul is muddled in relativism, desire, emotional manipulation. “Tolerance” = draining of will. Liberal order cultivates confusion to make the heart porous to vampirism and inversion.
Body (Flesh / Soma / Material)	Temple of the Spirit; disciplined, trained, consecrated. Food, sex, labor all aligned to sacred measure. Body is vehicle of Virya (spiritual strength).	Body reduced to commodity, appetite, consumption. Fed on meat, drugs, porn, and distraction. Kept weak, addicted, docile. Goal: break vessel so demons can enter and feed.

What was to be of man, if we did not have hope? Actually, we find that there is a direct line of inference from faith, hope and will to certainty. The war is already won, when we realize that we are inherently good, inherently free, inherently already at home. This is the heart, as a metaphor for faith, hope and love. The Demiurge seeks to erase this line of thought, inference and conviction, erase the existentials (Heidegger, 1927) of man itself, and to render man subjugate to materialist explanations of life. This is “the modern episteme”, as Foucault (1970) described. The war has over the last centuries intensified, and nowadays a false light, the light of the evil Demiurge and the Black Order, has engulfed the world and mankind. According to a Danish study (Kessing et al., 2023), 80% of people in Denmark will at one point have psychiatric treatment. How disgraceful for man. Is this not a clear sign that the ill people are not the general population, but rather those current power holders, who define the very society, truth and reality of man today, and who subjugate mankind in materialist thralldom, denying mankind a spiritual life, denying the spiritual, mystical and occult war and the potential for spiritual liberation – a higher order? So, according to the logic of the Demiurge, all of mankind, expect the Black Order agents, are mentally ill and should have their senses and brains poisoned. Is this not true existential war, disguised as benevolent treatment of the projected helpless, ignorant, delusional and sick *volk*? This is the manipulation of consciousness and perception of reality, the third and overarching level of power, according to Lukes (2017), which is taking place, predominantly in the Western world today. So it is a war. Why do they call us sick? Because they hate the true man and woman – they are psychic vampires, feeding of the fear, uncertainty, anxiety and helplessness of the people, as for example Virilio (2012) has written about. It is Orwell’s (1948) 1984 and Huxley’s (1932) brave new world, when the people are so enslaved that they dare not question their own beliefs as to the veracity of the truth they are given in the Platonic cave (Plato, 375 BC) by their ominous masters of mind control and perception. Rather than questioning the self-proclaimed authorities, as Kant (1784) would have us do, the people increasingly end up diagnosed in an self-imposed prison of false consciousness.

Contrasting the two notions of state and war

Aspect	Nationalist / Total War (Hegel, Schmitt)	Liberal / Partial War (Kant, Clausewitz)
Philosophy of the State	The State is the embodiment of the Absolute; the <i>ethical totality</i> .	The State is a juridical framework; a social contract of individuals.
Concept of Sovereignty	Sovereignty is indivisible, absolute, transcendent; friend–enemy distinction defines politics.	Sovereignty is relative; authority is mediated by negotiation, treaties, international law.
War's Essence	War is existential and total: the confrontation of peoples, the struggle of life and death.	War is instrumental: “the continuation of politics by other means,” limited in scope and purpose.
Aim of War	Eradication of the enemy's essence, annihilation of hostile will, spiritual totality.	Imposition of conditions, bargaining, forcing the enemy into compliance without destruction.
Relation to Enemy	Enemy is the “Other” to be overcome totally; ontological adversary.	Enemy is an adversary, but ultimately a partner in negotiation; war aims at compromise.
Relation to Peace	Peace is only meaningful as the victory of one side, the annihilation of opposition.	Peace is the “natural” state of humanity; war is an interruption, to be ended quickly by treaties.
Time Horizon	Eternal, existential, metaphysical struggle of nations/peoples.	Short-term, tactical, calculative, oriented to cost-benefit and balance.
Politics & Spirit	War is politics in its purest form: the will of the people/state made manifest; spiritual mobilization.	War is subordinate to politics; an extension of diplomacy; rational, strategic.
Mobilization	Total mobilization of society; no separation of civilian/military.	Partial mobilization; clear distinctions between civilian and combatant.
View of History	History is driven by conflict; dialectic of nations and absolute Spirit.	History tends toward perpetual peace; rational progress through law and commerce.
Aetheric Dimension	War as cosmic struggle; battle between spiritual orders of Being.	War as technical matter, governed by rational calculation and human limitation.

This outline is based on Hegel (1821) and Schmitt (1932) vs. Kant (1795) and Clausewitz (1832). The main point to distill from these opposing views is that Liberalism seeks not to eradicate its perceived enemy, but to subdue it and eventually assimilate it. Why is this? Basically, because Liberalism follows “the logic of economy”, rather than “the logic of war”. And why this? In the esoteric, occult tradition, we explain this by the fact that Liberalism is a vampiric system, a system set up by the Demiurge, which preys on the spiritual energies of good people and feeds on the lives and emotions of good people, so they need their preys to be alive. The world should be seen from this occult, transcendental perspective to gain absolute clarity over the military-strategic situation. That is why Liberalism always talks about “humanity”, “tolerance”, “multiculturalism” etc., newspeak euphemisms for subjugation.

White Order (Aryan) vs. Black Order (NWO)

Aspect	White Order / Aryan (Aufheben)	Black Order / NWO (Singularity)
Spiritual Foundation	Rooted in faith, love, will, and the eternal heavens.	Rooted in denial, fear, control, and materialist death-drive.
Purpose of History	History is the unfolding of Spirit toward divine freedom.	History is a program to be ended, rewritten, or simulated.
Human Nature	Aryan as bearer of spirit, capable of freedom, love, and transcendence.	Human reduced to bio-unit, programmable, disposable, replaceable.
Relation to Technology	Technology serves Spirit, as White Technology, harmonizing with divine law.	Technology enslaves Spirit, as Black Technology, suppressing divine law.
Ethics	The good is preserved and elevated; evil is negated.	Good is inverted into evil; evil is normalized as “progress.”
View of Death	Death is transfigured — gateway into higher life, eternal meaning.	Death is feared, denied, “cheated” by machine-immortality or data-cloning.
Community	Volk, Brotherhood, Sisterhood — organic unity of heart and will.	Mass, Hive, Crowd — mechanical conformity under total surveillance.
Law	Law of the heart: eternal, divine, spiritual justice.	Legalism of power: technocratic decrees, bureaucratic force, economic slavery.
Final Destiny	Transcendence, return to the divine source, the immortal heavens.	Collapse into eternal mechanization: digital hell, synthetic eternity.

There can be no doubt that we in the Aryan Order fully support the concept of war of Hegel and Schmitt. What are then the fundamental characteristics of the the White Order vs. the Black Order? The White Order is the order of the heart, of the day, while the Black Order is literally the order of death and darkness. Of course, the current powers-that-be go out of their way to deny that there is any such thing as a transcendental, spiritual and ethereal “day” of the heart, and instead they call all darkness “day” – so in modernity and post-modernity, we are living in the “dark night of the soul”, but be aware that the White Order is rising all over the world, from Japan and China, to Russia, much of Europe, and to the US and South America. But in Europe, the stakes in resistance to the Black Order are high. A massive suppression against the White Order in Europe is taking place. Libel, judicial murder, forced medication and psychotronic warfare aggression are talking place against the leadership of the White Order/Aryan Order – all kind of hit-jobs and covert warfare. But our enemies still will never acknowledge the occult war, for in doing so they would lose their credibility as power holders to the public, the public, who is kept utterly ignorant of the war, if they have not themselves awoken. But for the spiritual, ethereal elite, the war is obvious and very demanding, as it has always been. The occult war is fought in the proverbial subterranean depths of deep politics and subconscious layers of mankind, though for the awakened ones, the war is tough. As Evola (2002) said, there is not a field in modernity where the occult war has not been enacted. We are living in the technetronic era (Brzezinski, 1982), and increasingly we bear testimony to the very real and for the Aryan Order actual threat of psychotronic weapons. Read more about the techno-occult war in Riis-Søndergaard (2024a; 2025a; 2025b). The introduction of technology in the equation of power and resistance is the jumping point.

Exposition and dialectical battle of the Orders

I. Exposition of the two Orders

Dimension	White Order (Angelic-Aryan Vision)	Black Order (Demiurgic-Vampiric Vision)
Ontology of Being	Life is rooted in Spirit, Aether, Crown & Heart; existence is a war of Light vs. Darkness	Denial of evil as ontological reality; reduces being to material/economic survival
Nature of Man	Hierarchical: Aryan as bearer of Spirit and higher faculties (crown, heart)	Egalitarian dogma: "all mankind is equal," denying spiritual differentiation
Core Intent	Eradicate evil, protect the sacred flame, restore cosmic order	Subdue, intermingle, and feed upon living Spirit through deception
Source of Power	Virya (inner strength), sacrifice, spiritual sovereignty, communion with divine	Predation of spiritual energies (loosh), parasitism, vampirism, manipulation
War	Total, existential struggle against evil; no compromise with demons	Managed conflict, negotiation, endless "dialogue"; war as control mechanism
Politics	State as guardian of the sacred order; war and law as expressions of truth	State as mechanism of deception; law as mask for domination and dissolution
History	Mythic-eschatological battle of angels vs. demons; eternal recurrence of Hyperborean flame	Progress narrative: "multicultural harmony," global governance masking enslavement
Morality	Grounded in truth, honor, and spiritual law (heart-law)	Grounded in relativism, inversion, Orwellian newspeak ("freedom," "tolerance")
Economy	Order of sufficiency, rooted in divine measure and aetheric exchange	Vampiric parasitism, usury, debt, exploitation; "Gnomes of Zürich" principle
Religion/Spirit	Zoroastrian, Hyperborean, Christian-Gnostic: Light vs. Darkness	Demiurgic cult masked as "universal humanism," worship of materialism
Strategy of the Enemy	Stand as adversary of the Demiurge and all its proxies	Deceive, intermingle, confuse categories; greatest victories: intermixing angels & demons, and making man kill animals
Ultimate Goal	Victory of Light, restoration of Hyperborean sovereignty, resurrection of Spirit	Eternal dependency on living Spirit; prolongation of Demiurgic dominion via deception

This diagram is a more detailed exposition of the the two conflicting worldviews, strategies and tactics. We wish to make it completely clear to the academy that the Aryan Order represents the order of the heart, order of the day, and that there is an alternative to the bleak outlook of the Black Order, the order, which via technology and psychotronic weapons so dominates today's political climate and occult geopolitics (Riis-Søndergaard, 2025c), but the struggle for justice is not in vain – because of Karma, the nefarious forces of the abyss cannot withstand the truth and law of the heart for very long, as we know to be the case. They will literally succumb from their aggression against the White Order.

II. Dialectics of the war

Sphere of Life	Black Order (Singularity / NWO)	White Order (Aufheben / Eternal Spirit)	Counter-Strategy of White Order
Politics	Total surveillance, technocracy, managed democracy, “end of politics.”	Polity of Spirit: Volk, organic law, sovereignty rooted in faith.	Expose the false neutrality of “technocracy”; revive politics as existential decision (Schmitt).
Economy	Global finance, debt-slavery, AI-driven labor replacement.	Economy of Life: gift, work as expression of will and dignity, rooted in nature.	Build parallel economies based on trust, honor, and life-sustaining work.
Technology	Black technologies: AI control, psychotronics, transhumanism.	White technologies: aetheric harmonization, tools serving spirit.	Redirect research to life-affirming sciences (aether, resonance, bio-spiritual).
Religion	Inversion: secularism, false ecumenism, cult of machine-immortality.	Eternal faith: love, will, spirit, rooted in heavens.	Expose counterfeit religions; cultivate authentic worship and higher gnosis.
Art & Culture	Mass culture, degeneracy, digital simulacra, endless irony.	Sacred art, symbol, myth, beauty as gateway to spirit.	Create counter-art that reveals eternal truths; fight ugliness with beauty.
Education	Indoctrination, “equity,” standardization, anti-spirit dogma.	Initiation, formation of soul, paideia, awakening of virya (inner strength).	Parallel academies, secret schools, order-based transmission of wisdom.
Science	Reductionist materialism, denial of spirit, black projects.	Integral science of aether, life, spirit, cosmic law.	Reveal suppressed science (Tesla, Vassilatos, Schauberger); reframe science as sacred.
Body & Health	Genetic manipulation, medical-industrial slavery, virtual life.	Temple of Spirit: body as vessel of life, health in balance with nature.	Develop White medicine: holistic, spiritual-energetic, natural.
Law & Justice	Law as power, technocratic decrees, bureaucratic tyranny.	Law of the Heart: divine justice, truth, freedom of Spirit.	Disobey false laws, affirm higher law, organize loyal communities.
Final Destiny	Collapse into Singularity: digital hive, eternal mechanization.	Return to the Immortals: transcendence, life beyond death, immortal heavens.	Fight until the end: affirm will, faith, love as eternal counter-force.

This diagram is a more in-depth look at how the opposing forces act in the different spheres of occult engagement, and what the counter-strategy of the White Order should be to the lies, deception and violence of the Black Order. As we can see from the previous diagrams, the stakes are utmost high. We wish for all the good of mankind to awaken to this epic struggle, so please do share our white papers.

The telos of world history – Aufheben vs. technological singularity

Aspect	Aufheben (Spiritual)	Technological Singularity
Ontology	Integrates contradictions into higher unity (negation → preservation → elevation). Dialectics of love and war.	Eliminates contradiction by collapsing spirit into machine-determinism.
View of Human Being	Human as spiritual, free, capable of transcendence in alignment with divine will.	Human as material substrate for AI, cyborg, data-processing unit.
Relation to Time	Temporal moments are aufgehoben into eternity (history as unfolding Spirit).	Time is “ended” by infinite acceleration of computation; eternity replaced by machine-stasis.
Ethics	Will aligned with good is preserved and elevated into eternal life.	Will negated, replaced by algorithmic determinism and technocratic control.
Metaphysics	Spirit (Geist) unfolds toward freedom, unity of life, love, and heavens.	Spirit denied — reduction to information, cybernetics, and simulation.
Relation to Death	Death is aufgehoben — temporal negation of life transformed into eternal affirmation.	Death is denied in a false sense — digital immortality, cryonics, transhuman storage.
Nature of Creation	Creation = act of divine will, love, and life; history has meaning.	Creation reduced to production — artificial, technological, synthetic “life.”
Community	Volk, order, and brotherhood united through heart and spirit.	Hive-mind, algorithmic governance, global surveillance system.
End-State	Transcendence into divine eternity, the heart as eternal law.	Collapse into anti-life, mechanization of being, eternal slavery of spirit.

Finally, we have arrived at the crux of the battle. What we here present, are the plans and agendas of the two opposing Orders. We can see from this diagram that the war is a matter of life and death, literally, not just in a liberal, metaphorical sense. But we shall be redeemed, for it is written in the proverbial Book of Life that good people shall inherit the Kingdom. Karma will prevail, and “worst comes to worst”, as it is said. But we should not concentrate so much on our enemies and their fate, for of course they are doomed from the wicked games they have played against the WO and good people. We should rather concentrate on what is the true promise of the Vedas and the Edda, and all esoteric teachings. These teachings are what we wish to be known for, and therefore we present the concept of (spiritual) Aufheben, for as Aryans, as Hyperborean Siddhas, we live our lives in the aether, so we know heavens, the transcendental plane, to be true. Therefore, we can authentically (for remember, the true Aryans are only in between 10.000 and 100.000) give testimony to the very divine nature of creation and as to the promise of spiritual enlightenment and liberation, the very point and purpose of temporal existence, being true. So there is a goal, not just meaningless pursuit of temporal goods and pleasures, but a higher order and purpose, than what we have been told in the mainstream discourse, which is nowadays saturated with endless, pointless “news”. But we bring true and good news, for we will prevail and we will return to origin in these the latter days, as did Nimrod de Rosario (1985; 2022; 2023) explore. We pick up, where de Rosario left off, and reveal the true nature of creation and hope.

Commentary on the systematic exposition of the existential struggle and some strategic remarks

Since the awakening and gathering of the Hyperborean Siddhas of Scandinavia and Germany in 2016, we have come a long way. Make no doubt about it that it is a Third World War (Riis-Søndergaard, 2024b), which primarily is a war of faith and epistemics, but as we have described, our adversaries have deployed psychotronic weapons to attack the light-bodies and crown-chakras of the Aryan Order leadership, for remember, the Aryan race shares a collective psyche and consciousness, which you can read more about in Riis-Søndergaard (2025d). But we have a plan, which you can read about in our recent essay, called ‘Masterplan of the Aryan Order’ (2025e). In an earlier essay, we have also described the idea of implementation of an Aryan spiritual aristocracy to rule our homelands (Riis-Søndergaard, 2024c). These essay presented, are all aspects of the masterplan of the White Order, which we in this essay have sketched out in full. For example, in the essay on occult geopolitics, we make ways in defining, who are the White Order in terms of geopolitical, spiritual alignment. Of course, may more aspects and nuances of the struggle will have to be sketched out, but in this essay, and in the other essay we have mentioned, we have given the very basics of the White Order structure, agenda, strategy and tactics, and defined what is the ultimate end-game of the existential struggle in these the latter days. The reality of the transcendental, Aryan/Hyperborean aether is a deeply suppressed reality. Many clues are there, especially in ancient literature (Sanskrit: Akasha, Greek: Aither), as we explain in many of our essays, but recently, a demiurgical iron-dome has been cast upon this awareness and reality in the form of a global, psychotronic control-grid, though much of New Age literature is interested in this notion of the psychic aether. But basically, you will be persecuted if you talk about this divine knowledge to the wrong people today, for the demiurgical system has become so ingrained in the West, though in India, the esoteric tradition is still rather vibrant. But now, a new generation of Aryans (we are incarnations and reincarnations, in Sanskrit: Samsara) have awakened and gathered in the Aryan Order (AO) and in our paramilitary wing, The International Defense-force of Aryans (IDA), and we are determined to bring true spiritual enlightenment, liberation and salvation to all the good of mankind, which luckily still is the majority, we find. We are a peacefull organization, who believe in the truth and law of the heart and the dialectics of the heart, but we are under severe psychotronic attack, so we wish to make a plea with all the good of mankind (the WO) to align with and support the Aryan Order, for example by supporting the Aryan Academy and our Aryan Defense Research Program (ADRP) to counter psychotronic weapons. We seek to establish a Research Institute for Spiritual Energies (RISE) and Spearhead Industries (SI) to study our spiritual energies, which are immense, and the aether, while developing defensive measures to the aforementioned weapons. We have written a paper specifically on our spiritual energies (Riis-Søndergaard, 2024d). We find that collective Kundalini-meditation is ultimately what is going to bring us back home. This collective aspect of the Kundalini is a revolutionary idea, which we are proud to present in our essay, called ‘Aufheben – Tantra, Kundalini, Transcendence’ (2022). Basically, in the gathering in an Aryan Nation of all the Aryans, and by collective Kundalini-meditation, the whole world-soul and spiritual energies of the good mankind will be uplifted, until absolute ecstasy, transcendence and ascension, as for example Plotinus (270) explored, and what is the promise of the Holy Grail (divine love). This knowledge of collective euphoria and ecstasy is deeply resented by the current powers-that-be, and it is what they fear the most. Even the Kundalini they hate and scorn, as if they had anything to offer themselves, which they absolutely don’t, for they “have become like death”, as Oppenheimer said. The whole lie of the Black Order is to deny mankind its spiritual potential, and as Dostoevsky (1877) said, the first evil was the lie. But the evil Demiurge is itself a lie – an utter falsehood and transgression against the good, the true and the beautiful, not to mention righteousness, so what can we expect? We wish to end this essay with a call out to the WO to unite and continue the struggle, for victory is ours.
